---

Allison:

Carol asked that I forward this on to you. I received a call yesterday afternoon from Doug Guarino, InSide EPA (703-562-8769). This is the reporter that has written the majority of the phosphate articles. He said he wanted to talk w/ me to get an update.

He first wanted to know the status of the "flyover." He also said that he has the FOIA response and had a lot of questions regarding the status of some of the issues discussed in some of the material. I told him I would forward his request.

He said he is writing a story for this week and needed to talk w/ someone soon. He said he was unable to get an update from EPA for his last article and did not want to write the article as though EPA had "no comment."
